

Flow Pipe & Float Plate & Funnel & Ladle

Product Name	Performance and Application
Flow Pipe Float Plate Funnel Ladle	All are sintered from SiO ₂ -based molten materials. Special-purpose float plates are formed from N17 materials, featuring strong corrosion resistance, no pollution to molten metal, and reusability. They are used with flow control series products: flow control bars & injection, tap out cone, graphite tap out cone, slag-blocking rings, ladles and etc, in low-pressure casting of aluminum alloy wire rods, slab ingot casting, cast-rolled coils, to adjust the flow of aluminum liquid and stabilize molten metal casting parameters.

Flow Pipe & Float Plate & Funnel

Flow Pipe

Fixed-size Specifications				
Item	Fixed size	Special size	Packaging quantity	Special packaging
Flow Pipe	Height 100-650mm	Process as per drawing	50pcs/unit	Pack as per demand
Float Plate	&100-400 mm	Process as per drawing	50pcs/unit	Pack as per demand
Funnel	Length 100-600mm	Process as per drawing	50pcs/unit	Pack as per demand
Ladle	Length 400-1400 mm	Process as per drawing	/	/
